

Microsoft Windows Operating System

Dr. Matinee Kiewkanya

2013 Revision by Dr. Jakarin Chawachat

Adapted for English Section by Kittipitch Kuptavanich

Department of Computer Science, Faculty of Science, Chiang Mai University

Outline

- ▶ Operating Systems
- ▶ Microsoft Windows
- ▶ Windows Basics
- ▶ Drive, Folder and Files
- ▶ Windows Explorer
- ▶ Creating, Selecting, Copy, Move, Restore and Search
- ▶ Compressing Files and Folders

Operating system

- ▶ An operating system (OS) is a collection of software that manages computer hardware resources and provides common services for computer programs.

- ▶ Examples of popular modern OS's: Android, iOS, Linux, OS X and Microsoft Windows

3

Microsoft Windows

- ▶ Microsoft Windows is a series of graphical interface operating systems developed, marketed, and sold by Microsoft.
- ▶ Over 90% market share

4

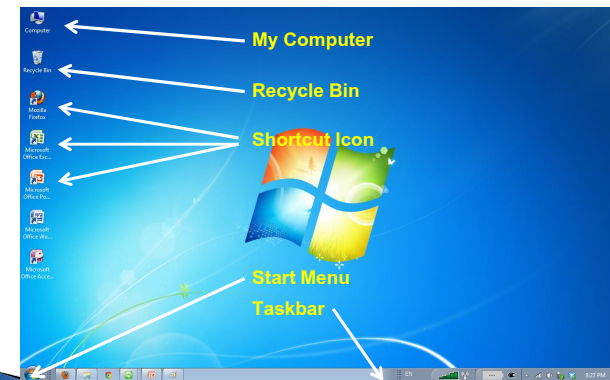

Microsoft Windows: Market Share (May 2013)

5

Desktop

6

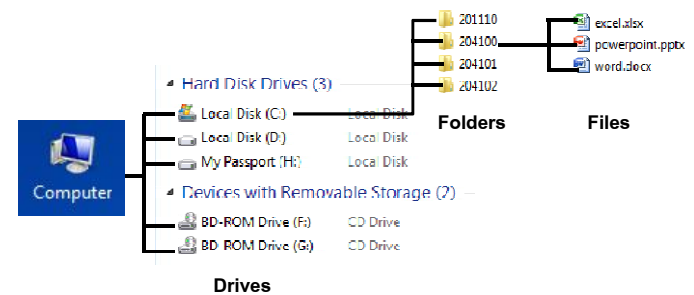

Mouse Operations

- ▶ Click
- ▶ Double Click
- ▶ Drag and Drop
- ▶ Mouse Pointer

7

Drives, Folders, and Files

8

Files and Folders

- ▶ A **file** is an item that contains information—for example, text or images or music
- ▶ A **folder** is a container you can use to store files in.

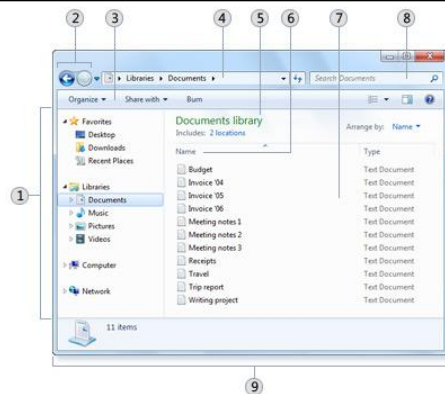

9

Accessing Folders and Files

- ▶ **Method 1: through Start Menu**
 - Click on Start button -> programs and files box -> type "Explorer" (without quote)
- ▶ **Method 2: through My Computer**
 - Double Click on "My Computer" icon on the Desktop
the Windows Explorer screen will appear

10

Windows Explorer

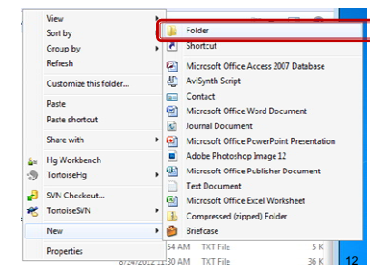

- ① Navigation pane
- ② Back and Forward buttons
- ③ Toolbar
- ④ Address bar
- ⑤ Library pane
- ⑥ Column headings
- ⑦ File list
- ⑧ The search box
- ⑨ Details pane

<http://windows.microsoft.com/en-us/windows7/working-with-files-and-folders>

11

Creating a Folder

- ▶ Open the drive or folder where the new folder will be created.
 - ▶ Click on the Menu "File" → "New" → "Folder"
- OR
- ▶ Right click on the **right pane**
a menu will appear, choose "New" → "Folder"
 - ▶ Type the folder name
 - ▶ Hit Enter

12

Naming Conventions

- ▶ The maximum filename length is 255 characters (including the extension)
- ▶ The following characters are not allowed: < > : " / \ | ? *
- ▶ Reserved names: **CON, PRN, AUX, NUL, COM1, COM2, COM3, COM4, COM5, COM6, COM7, COM8, COM9, LPT1, LPT2, LPT3, LPT4, LPT5, LPT6, LPT7, LPT8, and LPT9.**

13

Creating a File (1)

- ▶ The most common way to create new files is by using a program e.g.
 - create a text document in a word-processing program
 - create movie file in a video-editing program.
- ▶ When you are ready to save your work, click the Save button. 

14

Creating a file (2)

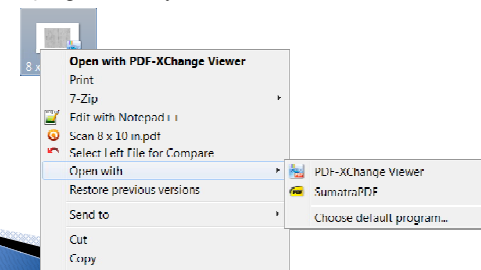

- ▶ Open the drive or folder where the new file will be created.
- ▶ Click on the Menu “File” → “New” → file type
- OR
- ▶ Right click on the **right pane**
a menu will appear, choose
“New” → file type
- ▶ Type the file name
- ▶ Hit Enter

15

Opening an existing file

- ▶ Method 1: To open a file, double-click it. The file will usually open in the program that you used to create or change it.
- ▶ Method 2 **Right-click** the file, click **Open with**, and then click the name of the program that you want to use.

16

Changing the Name of a File or Folder

- ▶ Right Click on the file/folder -> **Rename**
 - Or press F2
- ▶ Enter the new name
- ▶ Hit Enter

17

Selecting Multiple Files and Folders (1)

1. To select a **consecutive group of files or folders**, click the first item, press and hold down the Shift key, and then click the last item.

2. To select **non-consecutive files or folders**, press and hold down the Ctrl key, and then click each item that you want to select.

18

Selecting Multiple Files and Folders (2)

- ▶ To select multiple files or folders that are near each other, drag the mouse pointer to create a selection around the outside of all the items that you want to include.

19

Copying and moving files and folders (1)

http://windows.microsoft.com/en-us/windows7/working-with-files-and-folders#section_5

▶ Drag and Drop

- Position the windows side by side on the desktop so that you can see the contents of both.
- Next, drag the file or folder from the first folder to the second folder. That's all there is to it.
- To copy within the same drive, hold down the Ctrl key while performing drag and drop

20

Copying and moving files and folders (2)

► Copy and Paste

- Select the files and/or folders you want to copy/move
- Right-click, then select *Copy/Cut*, then go to the destination and Right-click and select *Paste*.

OR

- Press Ctrl-C to copy, Ctrl-X to cut (move)
- Then go to the destination and press Ctrl-V to paste

21

Deleting Folders and Files

- To delete a file, open the folder or library that contains the file, and then select the file. Press Delete on your keyboard and then, in the **Delete File** dialog box, click **Yes**.
- When a file/folder is deleted, it's temporarily stored in the Recycle Bin.
- To permanently delete a file/folder hold down the **Shift** key before hitting the **Delete** button

22

Recovering Folders and Files

► On the Desktop

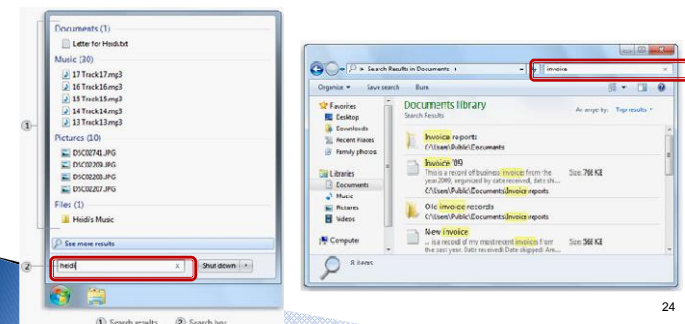

- Double click on the Recycle Bin Icon
- Right click on the file/folder -> **Restore**

23

Finding Files and Folders

1. Start Menu's Search Box
2. Windows Explorer's Search Box (press F3)

24

More on Searching (1)

- ▶ You can use filters such as **size:**, **content:**, **kind:**, **type:** to limit number of results.
- ▶ **size:** filters results based on file size.

25

More on Searching (2)

- ▶ **kind:** filters search based on category of files

26

More on Searching (3)

- ▶ **content:** search the content of the file, not just file name

Usage: **content:keyword**

Where **keyword** is what you want to search in the file.

Example: **content:homework**

27

File Compression

- ▶ Compressed files take up less storage
- ▶ Can also combine several files into a single compressed folder. This makes it easier to share a group of files.

28

File Compression (zip)

1. Locate the file or folder that you want to compress.
2. Right-click the file or folder, point to Send to, and then click Compressed (zipped) folder.

A new compressed folder is created in the same location. To rename it, right-click the folder, click Rename, and then type the new name.

29

File Extraction (unzip)

1. Locate the compressed folder that you want to extract files or folders from.
2. Do one of the following:
 1. To extract a single file or folder, double-click the compressed folder to open it. Then, drag the file or folder from the compressed folder to a new location.
 2. To extract the entire contents of the compressed folder, right-click the folder, click Extract All, and then follow the instructions.

30
